

Affinity Table

How do we dilute the powers of AI to prevent them from overtaking technology

Human Centered Development

Use AI to help people, not replace them

Focus AI use on support roles.

Promote human-AI collaboration training programs

Design AI that requires human confirmation for important actions

Technical Safety

Build "off-switches" and control protocols

Limit self-learning or self-replication functions

Use smaller and more specialized AI so it does not over-control.

Check and update AI safety often

Government Accountability

Require protocols of AI used in major industries

Impose limits on AI data control

Fund AI ethic businesses.

Support collaboration between tech companies and regulators

Education and

Teach students and workers about AI

Help people understand AI and its limitations

Talk openly about AI limitations

Train leaders to use AI responsibly
